

Industrial Doors

Concertina

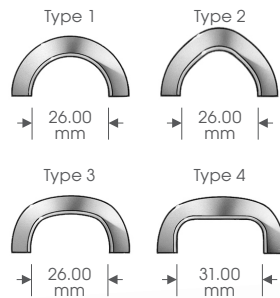

Concertina door kits
Specially manufactured kits individually tailored to suit any size or make of door, suitable to seal top and bottom.

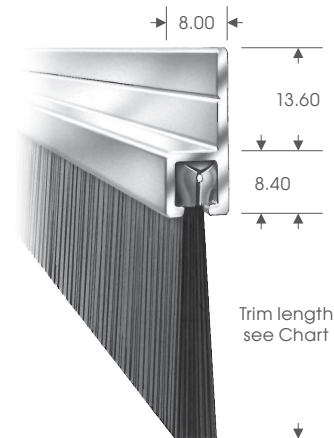

Individually assembled kits designed to seal most makes of Concertina/Folding shutter doors. Each kit contains pre-cut and punched lengths of Formseal No. 3 section and specially formed nose pieces suitable for sealing the top and bottom of Concertina/Folding shutter doors.

Kits are available in 20mm, 34mm and 50mm brush trim lengths. All products are aluminium mill finish. Brushes are black with nylon 6 filament. Panels are available in 3 sizes; 6" (150mm), 9" (230mm) or 12" (300mm).

Nose cone styles

Brush Strips

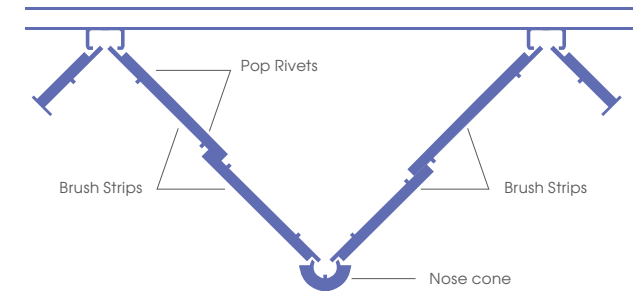

Aluminium thickness: 1.6mm

No. 3 Section - Medium

Specify your order

- Choose your size 6" (150mm), 9" (230mm), 12" (300mm).
- How many panels do you need?
- How many nose cones do you need?
- Shape of door.
